THESE pictures show President Bennett, surrounded by the heads of the different departments, under whose supervision your orders for anything from our complete stock will be handled. Each is a specialist in his line. All together, they have the ability, facilities, and desire to give good service. They are ready at all times to serve you.

---

# INTRODUCTORY

---

**T**HIS catalog has been prepared for our customers. We want to put it into the hands of every interested man and woman. By looking through it you will see the actual pictures of our different windows, doors, etc. We call your attention especially to the handsome front doors, the serviceable windows, attractive mouldings, the artistic paneling, and the many other things which will go into your home so nicely and add so much to it in attractiveness, and be a constant cause of satisfaction to you.

Do you want to save the middlemen's profits for yourself?

Then buy your *lumber and building material* direct from us.

## THE BENNETT PLAN

For years we have been in the lumber business here at North Tonawanda, starting in a small way. Through square dealing, right quality, fair prices, and good service we have built up a great business of hundreds of thousands of dollars a year, one of the largest of the kind in the country.

Instead of selling to jobbers and retailers, our plan is to sell our doors, windows, and interior trim direct from our mills to you, and also to make shipments of both rough and dressed lumber, of all kinds, direct from our wholesale yards to the consumer.

## THIS SAVES YOU ALL THE MIDDLEMEN'S PROFITS

The same quality, service, and square dealing that has brought our business up to its present proportion will bring thousands of satisfied customers to us from now on.

### WHY?

- FIRST *Because you can save money.*  
SECOND *Because you can get the highest quality.*  
THIRD *Because your doors, windows, and interior trim will reach you in better condition, owing to less handling.*  
FOURTH *Because we give you a service that you could not get from jobber or retailer, owing to our immense stock from which to make your selections and our unsurpassed shipping facilities.*  
FIFTH *Because you are dealing with a big, reliable concern, ready and anxious to serve and to satisfy you, amply able and willing to make good every statement and promise contained within the covers of this catalog.*

## HOW WE CAN SAVE YOU MONEY

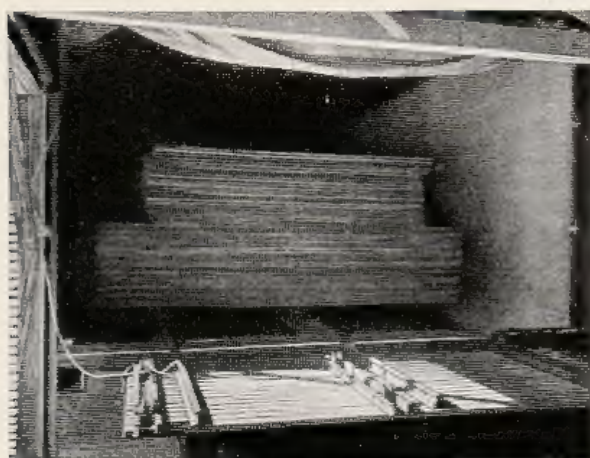

WEST END OF PLANING MILL

SHIPMENTS DIRECT FROM DOCK

You doubtless begin to see now how it is that we can make you such low prices—how it is that we can surely save you money. Not only are we cutting out all profits heretofore paid to *middlemen*, a big saving in itself, but you are getting the benefit of our organization and our expert knowledge of this business, all of which means economy, saving of waste, and, consequently, low cost. We aim to get our goods to you without one single lost motion or one cent of unnecessary expense or outlay.

ONE OF OUR DRY-KILNS

We have our own docks here on the Niagara River, which puts us in direct connection with the great lumbering operations of the upper lakes and Canada, thereby enabling us to take advantage of the cheap water transportation, which eventually means lower prices to you.

Another reason why our prices are low is that our catalog and Uncle Sam are our only salesmen. We save you all unnecessary middlemen's commissions and profits.

### WE ARE LEADERS ON QUALITY

We are sure we can please you on quality. As we are specialists in our lines, each process and division of our work has been carefully studied out, with the aim, always, to have our stock not only serviceable and durable but to have it of the highest quality procurable. We have our own dry-kiln, through which all of our lumber is run before manufacturing into doors, sash, floorings, trim, etc. This enables us to give you stock of the very highest quality, guaranteed to give satisfaction.

### DIRECT SHIPMENTS TO YOU

By making *direct shipments* to you it is very apparent that the stock you receive will be much more fresh and bright than as though it passed through the hands of several middlemen.

You can readily see that the chances for breakage and soiling are much less when shipments are made direct to you rather than having the stock shipped and reshipped before it reaches you, to say nothing of the additional expense which is added to its cost with each handling.

We realize the importance of having the stock reach you safely and in good condition. Everything is carefully packed and you need have no fear at all on this point. We absolutely guarantee safe delivery. *Should* there be any damage done before it reaches you, all you will have to do is to make your freight agent—*before you accept the shipment*—write on the freight bill exactly what the damage is. Then when you send us the freight bill, signed by the freight agent, we will see to it that everything is made right with you and that you do not lose a cent.

### OUR SERVICE IS THE BEST

When you send an order to us, you are sending it to men who are interested in you, and will give your order careful and personal attention. Being interested in the success and growth of our business, we want your business, and, furthermore, we want you satisfied and pleased. Thus, by good service and careful personal attention, we gain satisfied and pleased customers.

Quick shipments are of vital importance, and here is where we excel. Our shipping facilities are of the very best, and are absolutely unsurpassed.

A network of railroad tracks running through our immense plant and yards enables us to load cars for any point with the utmost economy and dispatch.

We carry such a tremendous stock of doors, windows, and interior trim—together with all kinds of rough and dressed lumber, lath, shingles, etc.—that we are able to fill your orders *at any time* without the least delay.

We also have our own planing mill, so

MILL TO CAR DIRECT

that we can guarantee our work in this line of manufacture, and know it is of the highest standard and up to specifications in every particular.

### RELIABILITY

We are rated high as to capital and A No. 1 as to credit by Dun, Bradstreet, and other commercial agencies. Your bank can tell you all about our standing and responsibility.

As to our business methods, we started small a dozen years ago, and the illustrations here will show you how we have grown; and this growth has been due to square dealing and to living up honestly to the letter and spirit of all our obligations. What we say is true. What we promise we fulfill. Place an order with us and you will be satisfied and pleased. If you want to know more about us, send to us at once for the names and addresses of our satisfied customers, or for bank references. These satisfied customers have built up this business—for "once our customer, always our customer." When you are up this way come and see us. We shall be glad to see you, no matter if you do not buy a cent's worth of us. We are glad to show our plant and what we are doing.

INTERIOR TRIM STOCK ROOM

DRESSED LUMBER AND SIDING SHED

### HOW TO ORDER

Simply use one of our order blanks, give catalog number, quantity, etc., of the different doors, windows, and interior trim, as shown in the catalog. Or if you want anything not shown in this book make out a list on one of our estimate blanks, and we will be glad to quote you our low, direct-to-you prices on anything in rough or dressed lumber, lath, shingles, siding, or, in fact, anything in our line.

### TERMS

We are able to quote low, rock-bottom prices only because we operate economically on a cash-with-order basis. While the credit of our customers is perfectly good beyond any doubt whatever, it costs us less to do business under our plan and enables us to offer you lower prices.

You run absolutely no risk in sending us your money, because we unreservedly guarantee every article which we sell to be exactly as represented, and if you do not find it so, it may be returned and your money will be refunded promptly, together with any freight charges which you have paid.

There is nothing to be gained by C. O. D. shipments, but we will make them at the request of our customers on orders amounting to over \$50, when accompanied by 25% of the full amount.

OUR PRICES ARE FREE ON BOARD CARS, NORTH TONAWANDA, N. Y. If you want a delivered price, send us a list of what you want and we will quote delivered at your station.

## STRICTLY CLEAR WHITE PINE WINDOWS

**T**HE lumber from which our windows and sash are made is strictly clear Western white pine, thoroughly seasoned and perfectly manufactured. We substitute no other woods. It is a recognized fact that there is no other kind of wood equal to white pine for the manufacture of sash and windows. It works easy in the frame, does not swell or shrink, and never warps. All of our windows and sash are made of clear stock, primed with linseed oil, and, therefore, are suitable for oil finish, or, if desired, can be painted to match any trim.

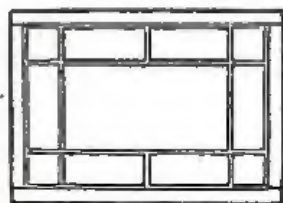

Our windows are all glazed with the best A quality American glass, and are guaranteed to give satisfaction.

The term "window," as used in this catalog, means two-sash, top and bottom.

The difference between a check-rail window and a plain-rail window is shown by the sectional cuts on this page. The difference lies in the "meeting rails," or where the top and bottom sash meet. As will be readily seen, the check rail forms a tighter and more nearly weatherproof connection than the plain rail, although the latter is used very extensively in some sections and will give good satisfaction. Check-rail windows are hung and balanced by sash cords and sash weights, which permit them to be raised or lowered to any desired position without additional support. Plain-rail windows are ordinarily used with spring bolts, and when raised or lowered the bolt slides into small holes bored at intervals in the jamb of the frame, thus automatically locking and holding them in position.

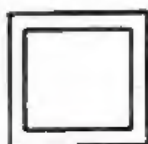

In ordering windows, give *width* first, then *height*, and then *thickness*. When size is given in inches it designates *glass size*.

Our stock sizes of windows are all made four inches wider and six inches higher than glass size. For example, a window listed 24" x 24" 2 lights, would be 2' 4" x 4' 6" outside measurement.

## ARTISTIC COTTAGE WINDOWS

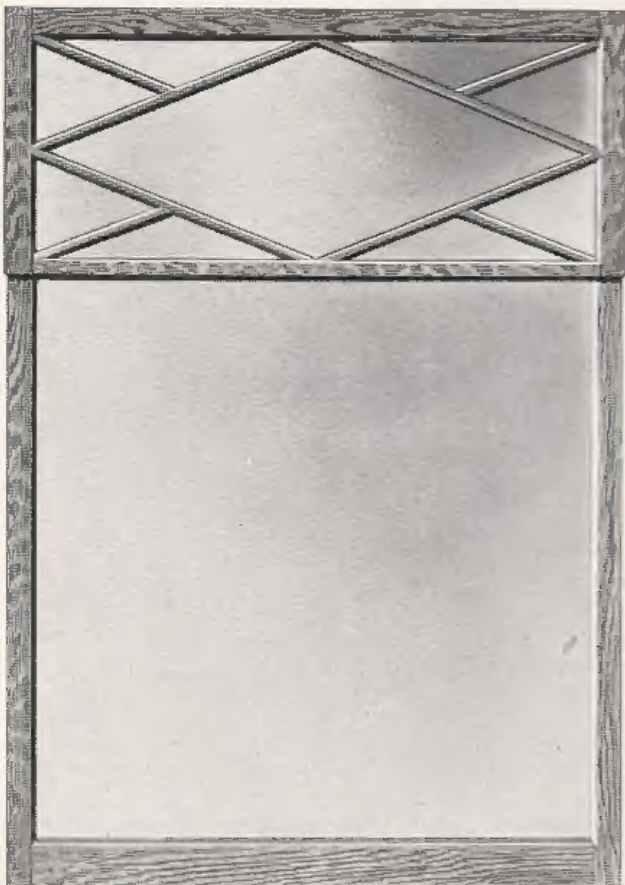

WE call your special attention to our line of handsome cottage windows, illustrated here. They are the most popular and highly desirable styles of windows for the front and sides of all modern homes, and have proved to be the most satisfactory.

No. 100

No. 100	
Size	Price
30" x 16"/40"	\$7.80
40" x 16"/40"	8.60
44" x 16"/40"	9.90
48" x 16"/40"	10.85

The artistic beauty of this leaded-glass design is seen at a glance. A window like this will add much to the attractiveness of your home.

No. 101

No. 101	
Size	Price
30" x 16"/40"	\$4.30
40" x 16"/40"	5.00
44" x 16"/40"	5.80
48" x 16"/40"	6.40

This plain cut-up-top design, glazed with our heavy crystal glass, is a universal favorite. It is noted for its durability as well as its distinctiveness.

FURNISHED ON REQUEST

ARTISTIC COTTAGE WINDOWS

THE large, clear, unobstructed lower light, together with the beautiful decorative top light, make them desirable as well as very attractive.

The designs, aside from their artistic excellence, have been selected with great care to meet all requirements as to coloring, clearness and strength.

No. 102		
Size		Price
30" x 16"/40"		\$ 7.80
40" x 16"/40"		8.60
44" x 16"/40"		9.90
48" x 16"/40"		10.85

This leaded glass design carries with it all that goes to make up a window of style and character. Its appearance harmonizes perfectly with our front-door design, No. 220.

No. 102

No. 103		
Size		Price
30" x 16"/40"		\$3.75
40" x 16"/40"		4.50
44" x 16"/40"		5.30
48" x 16"/40"		5.90

The artistic value of this top-sash design lies in its simplicity. The bars, as well as the rails, are made of clear white pine, and will last a lifetime.

## A WORD ABOUT OUR HANDSOME DOORS

**T**HE illustrations on the following pages show a number of carefully chosen styles, which can be furnished by us at prices which, we feel confident, will be within the reach of all.

In quality of material, finish, and general reliable character these goods are not excelled by any on the market. Nothing so adds to the beauty of a home as its doors.

The "Bennett Plan" enables us to offer doors to you that combine quality, durability, style, and beauty, at a price which is even lower than that of the ordinary door.

Our front doors are, without doubt, the most attractive, as well as the most serviceable, of any doors on the market to-day. They are of our own designs, and in making up this catalog our aim has been to show you a choice assortment of the most popular styles—doors that possess character, distinctiveness and beauty. The oak and birch doors are veneered with the highest quality rotary-cut stock, over a soft-wood core, interlocked and glued, making a door that is strictly warp proof. Veneered doors, when properly made, are much more durable than a solid door, as they will neither shrink, check nor warp. To obtain the best results, they should never be hung where they will be directly exposed to the weather. Veneered front doors should be protected by a porch.

Wish to call your attention especially to the beautiful two-panel California fir door shown on page 14. This door is made of solid vertical-grain fir stiles and rails and built-up fir panels, which makes a door that is hard to beat, both in appearance and durability. The panels are built up three ply, with the grain of the core or center ply running at right angles with the two outside or face veneers. This construction makes a panel that will not warp, check, or shrink; the face veneers are rotary cut, which enables us to produce a very beautiful grain effect in the panels, which cannot be obtained in any other way. They can be finished to match either light or dark oak, mahogany or yellow pine.

The cuts of the doors, as shown on the following pages, are the highest production of the printers' art, but with all their skill they fail to portray the artistic beauty of the doors themselves, which must be seen to be appreciated; and when they are finished in any of the different methods now in vogue their beauty is unsurpassed.

### CARE OF HARDWOOD DOORS

As soon as you have received the doors, and have removed the crating and packing, have them filled with one coat of good filler—two coats are better, but one coat well applied will do. Never place a door of any kind nor any other interior finish in a freshly plastered building. Be sure that the plaster is thoroughly dry, and where possible it is best to dry out the building with artificial heat. When a door has been fitted and hung, paint the top and bottom edges of the door with pure lead and oil. If these suggestions are carried out you will get the best and most satisfactory results.

## INTERIOR TRIM

On the following pages are illustrated the principal designs of interior trim that our experience shows are the leading patterns used to-day.

Our designs are of such a varied assortment that no difficulty should be experienced in making a satisfactory selection.

We show, too, a large variety of mouldings, such as exterior crown and bed mouldings, veranda trims and water tables, all of which we manufacture out of selected stock, thoroughly dried and run on the most up-to-date machinery.

The cost of oak paneling, as shown in above cut, is nominal, and adds materially to the attractiveness of a house.

PRICES FOR PANELING MATERIAL FURNISHED UPON REQUEST

## STAIR WORK

SIMPLY A "SUGGESTION" IN MISSION

ON THE FOLLOWING PAGES ARE SHOWN VARIOUS DESIGNS OF NEWELS, BALUSTERS, RAILS, ETC., WHICH WE CARRY IN STOCK. PRICES ARE REASONABLE, AND WE CAN MAKE PROMPT DELIVERY.

THE PRICE QUOTED IS PER HUNDRED LINEAL FEET WHERE NOT OTHERWISE STATED

BENNETT'S SUPERIOR FRAMES

Outside Door Frame

Outside Window Frame

Do not compare our frames with the regular cheap stock made up of odds and ends, short pieces of all kinds and grades of lumber. We make our frames in large quantities and use clear redwood lumber of the highest quality, all machined to go together with no extra work. Frames have moulded cap, have pockets cut, and are bored for pulleys. Our price includes rustless steel sash pulleys.

Our frames please the most particular people and there is never a complaint on them. We are shipping these frames all over the country and our customers have nothing but the highest of praise for them. Try an order of our frames and you will never regret it.

OUTSIDE DOOR FRAMES

2' 8" x 6' 8" and smaller, . . . . .	\$2.10
2' 8" x 7' 0" . . . . .	2.20
3' 0" x 7' 0" . . . . .	2.25

When ordering frames, be sure to give thickness of door for which frame is intended.

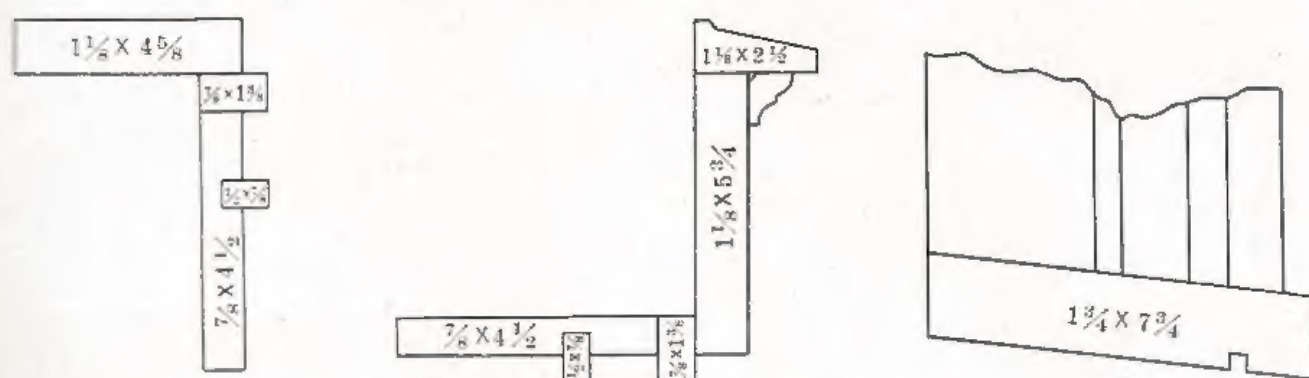

Our frames are all furnished with moulded head, and jambs are 5½" wide, including blind stops. Outside casings are 1½" x 4½". Head casings are 1½" x 5½". Door jambs are 1½" x 5½". Oak sills are 1½" x 7½".

WINDOW FRAMES

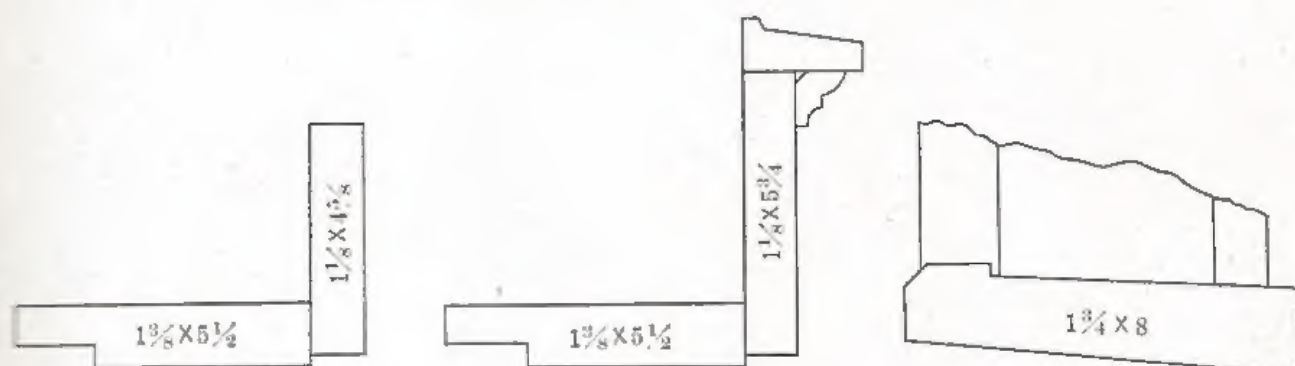

24" x 24" 2-light and smaller, . . . . .	\$1.60	30" x 24" to 30" x 30" . . . . .	\$1.95
24" x 26" to 24" x 30" . . . . .	1.80	36" x 24" to 36" x 30" . . . . .	2.00
26" x 24" to 26" x 30" . . . . .	1.80	40" x 24" to 48" x 30" . . . . .	2.20
28" x 24" to 28" x 30" . . . . .	1.85		

Can furnish any sizes not listed here at proportionate prices. Our frames are shipped in the knock-down, all ready to nail together and set in building. Have pockets and pulley holes all cut. Rustless pulleys included and furnished at above prices.
